The World is Going Digital and IT is at the Center

Organizations of all shapes and sizes are doing more, better, and faster...digitally.

89%

of all companies have already **adopted a digital-first business strategy** or plan to do so.[1]

CIOs

are reported as most often **owning or sponsoring digital transformation initiatives** (28%), with CEOs increasingly playing a leadership role (23%).[2]
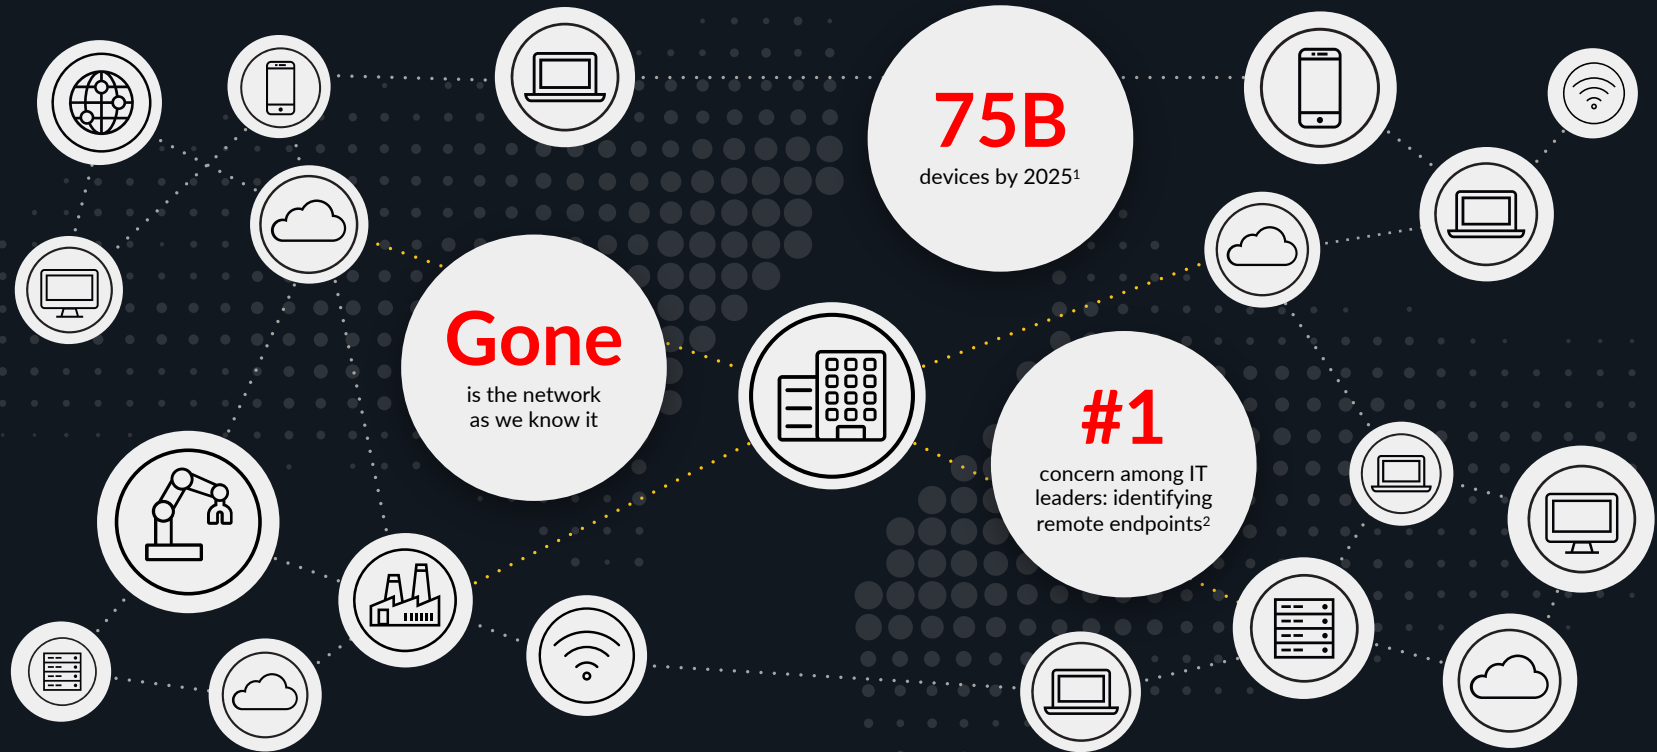

~50%

of all companies say improving **customer experience and customer satisfaction were the leading influences** to start a digital transformation.[3]

Endpoint Complexity Continues to Increase

The move to digital and work-from-anywhere accelerates this complexity.

75B
devices by 2025[1]

Gone
is the network
as we know it

#1
concern among IT
leaders: identifying
remote endpoints[2]

Drive Smart Decisions with a Single Platform

Unifying on a single platform eliminates silos and decreases time to react.

A single view across IT Ops & Security to eliminate visibility and accountability gaps.

Reduce time and effort to perform critical tasks and to respond to incidents quickly.

Dramatically reduce or eliminate time to support and manage infrastructure.

Tanium

Realtime Reach

- Visibility & control powered by Tanium's patented technologies

- Depth & breadth of data and context to make decisions in seconds

Seamless Experiences

- Unified platform for managing and securing all of your endpoints

- Transition from IT ops to security, cloud to on-prem in a single unified experience

Autonomous First

- Automation brings efficiencies to repeatable tasks

- Automation as a force multiplier, making your team more effective

TANIUM

Real-Time Everywhere: Workload Diversity

Tanium XEM for wherever work is done

Tanium XEM Platform

End User Devices	Data Center	Virtual Environments	Cloud Hyperscalers	Cloud Workloads	Operational Technologies

Continue to enhance the platform for all devices — Support for new environments

TANIUM

What Tanium Incident Response delivers

Dramatically reduce your average Meantime to Resolve (MTTR) with augmented SIEM and EDR

Real-time Visibility

Dramatically improve your Mean Time to Resolve (MTTR) with complete visibility and analytics

Integrated Collaboration

Break down the silos. Hunt and investigate with a shared collaboration workspace.

Real-time Remediation

Bring the environment back to a secure state with a complete range of remediation actions
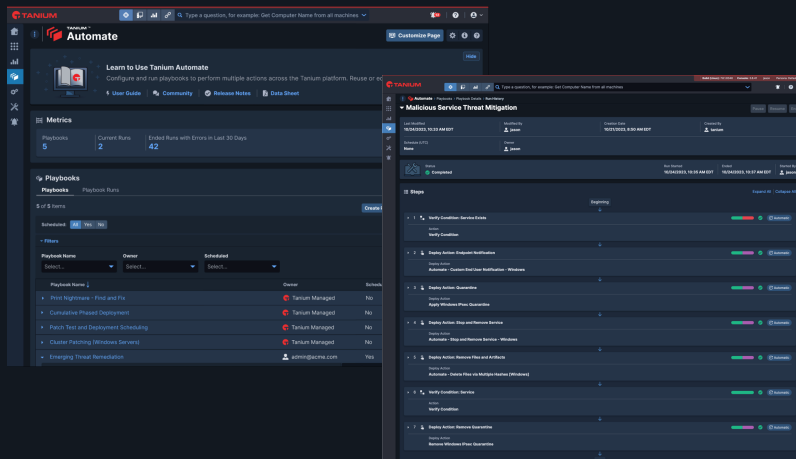

Tanium Automate

"Tanium Automate is a no-code workflow builder and automation engine solution in the platform that will enable operators to create logical, repeatable action sequences to more efficiently manage the IT estate and rapidly respond to incidents"

1. Leverage Tanium's platform speed to execute endpoint actions in series at scale with real-time data

2. Deliver Hard ROI by automating and driving efficiency for mission-critical but repetitive and manual tasks

3. Support consistency of workflow execution and interoperability with third-party systems

Automate is included in the Core Platform at no cost

Thank you

Get proactive about security and protection from emerging threats
