

AI Secure Chat Portal

Boost productivity, reduce costs, and stay secure

We believe adopting AI will significantly enhance our competitive edge. As a leading global investment firm in a regulated industry, controls are essential.

Apex has helped us implement the building blocks for AI effectively, allowing for its future expansion across our firm."

Adam, CIO, Investment firm

"With Apex I have unified access to all of my favorite LLMs. It helps me be more productive as I can easily switch models and use them with my company's data and internal file systems. I use Apex daily and get the best out of AI."

Tom, Apex Portal user, Public Company

Apex's Secure Chat Portal empowers organizations to leverage GenAI securely—all at a fraction of traditional costs. With **model-agnostic** access across LLM providers and **AI assistants tailored for your business workflows**, Apex boosts productivity, supports compliance with data privacy regulations, and achieves substantial cost savings.

Significant Cost Savings

Unlike traditional GenAI platforms, Apex's pay-as-you-go model reduces costs dramatically. **With an average spend of just \$0.40 per user per month** compared to subscription-based platforms like ChatGPT Enterprise at \$60 per user per month, Apex enables organizations to scale AI affordably.

Automatic Data Masking & Real-Time Threat Detection

Receive real-time alerts within the chat interface for any risky or non-compliant prompts, ensuring adherence to industry and data privacy regulations and **preventing unauthorized data exposure** with intelligent masking to keep smooth user experience.

Unified Access Across LLM Providers

Interact with any LLM through Apex's vendor-agnostic portal. Enjoy the flexibility of multiple providers without the limitations or costs of a single subscription-based platform.

Enterprise-Ready AI Assistants & Customizable AI Tools

Access pre-built AI assistants for workforce assessments, engagement, and skills analysis, or develop custom assistants tailored to specific industry workflows, maximizing efficiency and boosting employees productivity.
