

Security Is Everyone's Job: Making Cyber Risk a Company-Wide Priority

Darrel Raynor, Director Cybersecurity Business Integration, LCRA

**For SINC National CISO &
Security Leaders Forum**

Presenter

*“Darrel’s energy and passion
influences team to
accomplish more than they
thought they could.”*

VP, Rational Software (now IBM)

Forming Cyber Dept story....

Darrel Raynor Director, Cybersecurity, LCRA

Darrel serves as Cybersecurity Director,
Business Integration for LCRA.

He increases efficiency, decreases friction and works with all business units, using clear communications internally, with customers, vendors, and partners to increase overall Cyber posture. Darrel is a senior executive, speaker, consultant, trainer, and turnaround specialist with 30+ years of leadership experience streamlining operations, optimizing systems, leading projects, and coaching people. Topics in demand include Cybersecurity Rationalization, Agile Transformation and Processes, Business Transformation Change Management, and Project Optimization.

Description

Cybersecurity isn't just a tech challenge—it's a people-driven challenge. Without a company culture heavy on security, even the best tools and policies will not be enough. In a world where a single click can trigger a crisis, every employee, vendor, customer, partner and executive must understand they are part of the security equation.

This high-impact session challenges senior cybersecurity leaders to rethink how they drive behavior change across their organizations. Learn how to embed cybersecurity into daily habits, leadership mindsets and company values—not just annual trainings. Discover how to transform security from "someone else's job" into a core part of how your business operates and succeeds.

Agenda

Key takeaways include:

- **Why traditional awareness programs are not enough—and what actually works**
- **Strategies to make cybersecurity ownership part of every role, from intern to CEO**
- **Leveraging internal influencers and business units to drive culture change faster**
- **Communicating the "why" behind security in a way that sticks**
- **Building a culture where secure behavior is the default, not the exception**

If you think cybersecurity tools are enough, *think again*. Culture is your true first line of defense—and the time to build it is now.

“Cybersecurity is not a set of products - it's a set of practices.”

Ed Amoroso, former CISO of
AT&T

Why traditional
awareness
programs are not
enough—and what
actually works

Why Use Cyber Awareness?

'C'ompliance to Regulations

'c'ompliance to Policy

Communicate Threats, Tips, Regulations and Policies, Socialize!

Provide Details that Apply in Certain Situations & for Specific Roles

'C'ompliance to Regulations

Federal
&
State...

**"In the middle
of difficulty lies
opportunity."**
- sentiment
famously
expressed by
Albert Einstein.

Cyber Insurance story...

'C'ompliance to Regulations

**Federal
&
State...**

NIST Critical Infrastructure Categories – LCRA belongs to six!

- ▶ Communications
- ▶ Dams
- ▶ Emergency Services Energy
- ▶ Government Facilities
- ▶ Information Technology Systems
- ▶ Water & Wastewater Systems

TxDIR story....

'c'ompliance to Policy

Bank story....

Most organizations have or refer to policies.

A 'once a year' attestation does not drive home all that needs to be done in an ever-changing cyber environment.

Awareness programs can be updated without explicit review by your governing body...

Provide Details that Apply in Certain Situations & for Specific Roles

- ▶ Situations can vary widely
- ▶ Environments carry different levels of risk (*e.g., internal and external assets, etc.*)

Ticket vs Email vs Call story....

**Strategies to
make cyber
ownership part of
every role, from
intern to CEO**

How to have Cyber Awareness Adopted Across Your Organization

Building a foundation with cyber awareness

- ▶ Start simple, scale smart
- ▶ Base on risk to your critical Infrastructure
- ▶ Leverage free and low-cost resources
- ▶ Partner! LCRA is in TxPPC, LPPC, EPRI etc.

HAEA story....

Leveraging internal influencers and business units to drive culture change faster

Putting awareness into action

- ▶ Making cybersecurity a habit in your culture
- ▶ Draft/volunteer Cyber Champions
- ▶ Train and empower your team
- ▶ Regular feedback cycles from your customers

LCRA story....

***Memorable links to Business Risks
that have been exploited, preferably
in your industry, will help keep to top
of mind...***

**Communicating
the "why"
behind security
in a way that
sticks**

Building a culture where secure behavior is the default, not the exception

Summary

- ▶ Why traditional awareness programs are not enough—and what actually works
- ▶ Strategies to make cybersecurity ownership part of every role, from intern to CEO
- ▶ Leveraging internal influencers and business units to drive culture change faster
- ▶ Communicating the "why" behind security in a way that sticks
- ▶ Building a culture where secure behavior is the default, not the exception
- ▶ Summary, Questions & Discussion
