

Agentic AI & Automation for Every Security Function

Introducing Swimlane Turbine, the world's fastest and most scalable AI automation platform

You + AI Automation: 17x Faster Security Operations

Only Swimlane Turbine can execute 25 million daily actions per customer, 17 times faster than any other platform, provider, or technology. Turbine's combination of cloud-native and agentic AI architectural approaches set it apart as the only AI automation platform capable of adapting to your evolving environment and threat landscape.

Thousands of AI Automation Building Blocks

Swimlane Marketplace offers the most comprehensive support for the security industry, making it easier and faster than ever to start using AI automation. Choose from over 6,000 pre-built building blocks, including connectors, playbooks, automation actions, visualization widgets, and end-to-end AI automation solutions.

The Leading Marketplace for Security AI and Automation

- + 111 Artificial intelligence automations
- + 524 Cloud security automations
- + 674 Data enrichment automations
- + 240 Infrastructure & IT services automations
- + 719 Security operations automations
- + 233 Ticketing & communications automations
- + 9 GRC automation extensions
- + 48 Vulnerability management automations

Meet Swimlane Turbine, the Full-Featured AI Automation Platform

Low-Code Playbook Studio Turbine Canvas

Turbine Canvas is the most intuitive yet comprehensive low-or-no-code playbook-building studio.

Generative & Agentic AI

Hero AI is a collection of private agentic and generative AI innovations available throughout Turbine

Infinite Integrations

Integrate Turbine with any REST API using pre-built connectors or on-demand, no-cost custom integrations.

Dashboards & Reporting

Highly composable dashboards and real-time reporting capabilities for all security stakeholders.

Case Management

A purpose-built AI case and incident management application with 72+ customizable record fields.

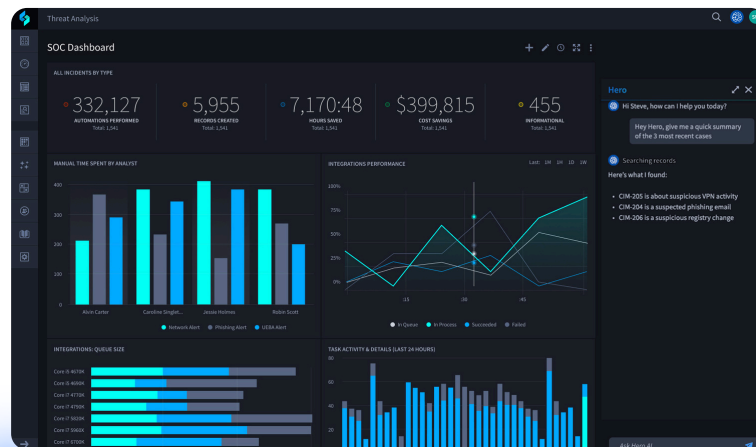

Cloud-Scale Processing Power

The Active Sensing Fabric is the engine behind Turbine's ability to ingest, enrich, and correlate data from broad and hard-to-reach telemetry sets at machine speed.

Get Started with Swimlane Turbine

Turbine can be deployed in the cloud, on-prem, or air-gapped environments. All it takes is one day to get up and running with Turbine in the cloud, with full use case implementation completed in two weeks or less.
